

It's your land.

DISCOVER

how much power it has.

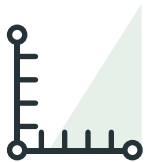

Turn your land into an asset that generates power and jobs for your community — and money for your family's future.

Working with Redeux

Developing your land into a solar farm provides you with a new revenue stream, generates clean energy and jobs for your community, and preserves your land for your family's future.

The Ideal Property

We work with property owners — from ranchers to farmers to industrial land use companies — to transform their land into sources of clean energy.

700+ acres — use a portion of your land or build with a neighbor

Does not contain major flood plains or wetlands

Flat land or rolling hills with limited slope

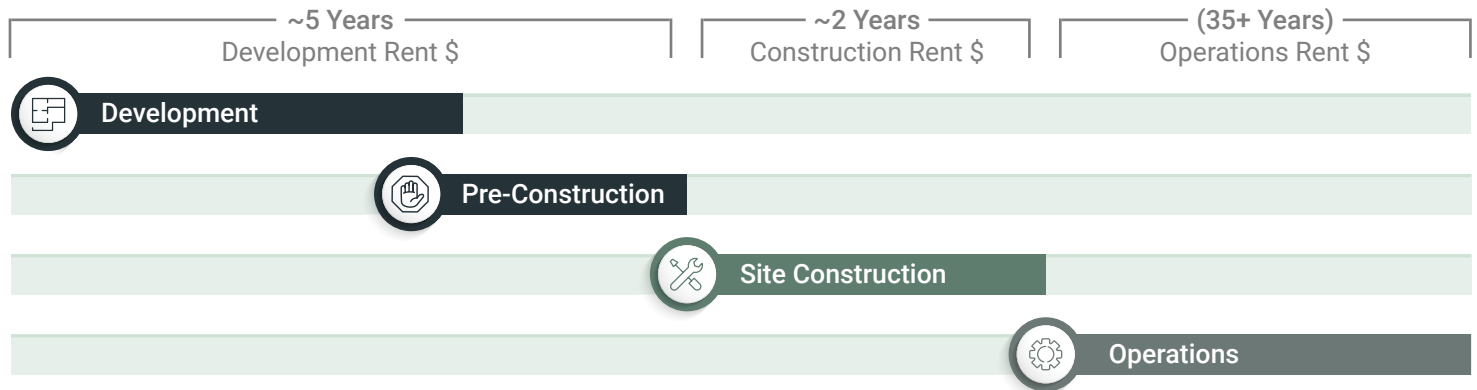

Located near electrical transmission infrastructure

The Benefits of Leasing Your Land

Working with Redeux allows landowners to diversify the use of their land.

- Turn your land into a source of long-term, reliable and predictable income.
- Increase annual cash flow per acre vs. farming, ranching and other activities.
- Ensure your property stays in your family for the next generation.
- Hedge against commodity cycles and farm input inflation while generating continuous revenue.
- Give underutilized land holdings a new purpose.
- Continue using your property for crop growth and grazing outside the solar facility.
- Boost tax revenues and create jobs in your community.
- Support energy stability and independence for your region.
- Foster land regeneration during 35+ years of facility operations.

Project Timeline & Payments

Development

- Engineering, permitting, contracting and financing kicked off
- No limitations on current land use
- Initial landowner payments, growing each year

Pre-Construction

- Time frame 6 - 24 months, depending on logistical constraints
- Construction and financing arrangements finalized

Site Construction

- Current land use ceases within project area; final resource harvest
- 12 - 24 month construction phase
- Landowner payments increase

Operations

- Operational area enclosed within security fence
- Some acres returned to previous land use
- Site traffic reduced to daily monitoring and routine maintenance
- Highest landowner payments

About Redeux

Redeux works with landowners to enhance the value of their property and provide communities with reliable, clean energy. Utilizing farming, ranching, timber and other properties, we develop utility-scale solar and storage projects that transform greenfield, brownfield and industrial lands into renewable power resources.
